Day 4 report

Birth OF SELENIUM GRID

Selenium grid was developed by Patrick light body to minimizing the test execution .He initially called the system **"HOSTED QA"**.it was capable of capturing screen shot during significant stages, and also of sending out selenium commands to different machines simultaneously.

BIRTH OF SELENIUM IDE

Shinya kasatani of Japan created selenium IDE ,a fire fox extension that can automate the browser through a record -and-play back feature. Further increase the speed in creating test cases . He donate selenium IDE to the selenium project in 2006.

BIRTH OF WEB DRIVER

Simon stewart created web driver circa 2006 when browsers and web applications were becoming more powerful and more restrictive with java script program like selenium core. It was the first cross platform testing frame work that could control the browser from the OS level.

BIRTH OF SELENIUM 2

In 2008 the whole selenium Team decided to merge web Driver and selenium RC to form a more powerful tool called selenium 2, with Web Driver being the core . currently ,selenium RC is still being developed but only maintenance mode . most of selenium project's efforts are now focused on selenium 2
